

Citibus ONE availability and pricing

The availability and pricing of **Citibus™ ONE** - our award-winning, web-based software for measuring and managing information risk and other areas of operational risk – are outlined below.

Availability

Citibus ONE can be deployed in three ways.

Citibus-hosted service

Our **basic hosted service** is intended to support trial or pilot implementations at modest cost. It can also support full, enterprise-scale roll-outs if required. If you select this option, your organization gains access to **Citibus ONE** over the Internet in return for an annual hosted service charge.

To deliver the service, we set up and maintain three implementations of **Citibus ONE** for exclusive use by your organization. Each implementation:

- runs on server(s) under our control
- is capable of evaluating a defined number of 'targets of evaluation' ie assets, entities, activities, processes or relationships (eg business application systems, computer installations, suppliers, sites or projects) that pose a risk to your enterprise which needs to be evaluated.

One implementation is for 'production' purposes. The second is for familiarisation, guided learning, training and demonstration; and the third for inspection purposes (eg to examine a new release).

A **premium hosted service** is also available.

In-house multi-user implementation

If you select an **in-house multi-user implementation**, we deliver **Citibus ONE** on disk with full documentation and a licence enabling:

- installation on server(s) under your control
- evaluation of a defined number of your organization's targets of evaluation.

As with our hosted service, a licence normally permits three installations: one for production; another for guided learning, training and demonstration purposes and the third for inspection / acceptance testing.

Users gain access over your corporate intranet.

Single-user laptop implementation

Single-user laptop implementations can be useful for:

- carrying out particular projects
- evaluating risk in places that lack Internet or intranet access
- guided learning, training, demonstration, inspection or acceptance testing purposes.

If you select this option we deliver **Citibus ONE** on disk, along with its documentation and a licence enabling evaluation of a defined number of your organization's targets of evaluation.

You can reduce cost by restricting the term of the licence (eg to three months, to suit completion of a particular project).

Maintenance

Our responsive **maintenance service** provides direct access to our help desk and will keep your implementation up-to-date with upgrades, patches and hot fixes.

Maintenance is included in our hosted service charge and is normally provided free for the first year of an in-house or laptop implementation. Continuing annual maintenance is available thereafter for 18% of the then prevailing licence fee.

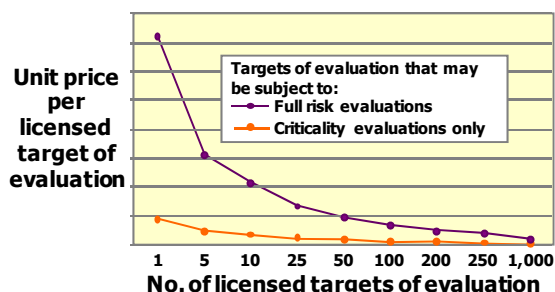

Pricing

The amount you pay for **Citibus ONE** depends on:

- the number of targets of evaluation you wish to evaluate (eg the total number of business applications, sites, processes or suppliers)
- how many of them are to be subject to criticality assessments only and how many may be subject to full risk evaluations
- your chosen method of deployment (eg hosted service, in-house installation, laptop installation)
- whether you wish to deploy a control framework that is available at extra cost
- any discounts that apply (eg for members of the Information Security Forum)
- contracts employed (our prices assume our standard agreements apply for software, maintenance and hosting services).

As shown below, the more targets of evaluation you wish to include in your risk programme, the lower the unit price per individual target of evaluation. This is to facilitate and reward large-scale, enterprise-wide deployments.

The price per target of evaluation drops to encourage large-scale deployment

Our progressive pricing model enables you to conduct a small-scale pilot at modest cost (eg using our basic hosted service). The initial cost can then be credited against the price of a larger-scale deployment.

For further information on availability or pricing, contact Citibus Limited either directly or via one of our Implementation Partners.
